

Purpose Statement

601/9098/5 ProQual Level 3 Diploma in Energy Management

Overview

This qualification provides you with a broad basic understanding of the core areas of energy management if you are employed, or want to be employed, as an energy manager. It also provides an opportunity to develop energy management knowledge and skills if you want to re-skill from other professions, such as facilities management, property or environmental services, or if you want to upskill your existing energy management knowledge and skills.

The qualification journey takes candidates beyond basic principles and into specifics for areas such as waste management, water management and carbon management. It also ensures that you explore behavioural change and motivation, key components for encouraging the breaking of new ground.

Achievement of the qualification enables candidates to apply for membership of energy management professional bodies, such as the Energy Managers Association (EMA).

Learning Outcomes

To achieve the qualification you must complete 11 Mandatory units:

- Energy Management : An Introduction
- Energy Management : Technical and Operational
- Energy Management : Energy Assessments, Measurements and Verification
- Energy Management : Behavioural Change and Motivation
- Energy Management : Regulatory & Legal Compliance and Carbon Management
- Energy Management : Strategy/Plan
- Energy Management : Waste Management
- Energy Management : Procurement
- Energy Management : Transport
- Energy Management : Water
- Energy Management : Information & Communications Technology

You will work with an assessor to complete a portfolio of evidence that confirms you have met the requirements of the qualification.

There are no entry requirements or specific skills needed to undertake this qualification.
