Purpose Statement

601/8167/9   ProQual Level 4 Certificate in Cyber Security and Intrusion for Business

Overview

This qualification builds on the fundamental principles of cyber security and is ideal if you already possess the skills to provide Information Technology Support, but are keen to demonstrate you can provide something extra and help to protect your employer's IT systems from cyber threats and attacks.

This qualification is ideal for enhancing your profile, if you are seeking a role in Information Technology Support and want to be able to offer more than just the ability to understand systems and support front end usage.

Learning Outcomes

To achieve the qualification you must complete 3 Mandatory units:

- Cyber Security for Business Networks
- Managing Cyber Security in Business
- Cyber Intrusion for Business

The qualification confirms your understanding and ability to deliver in areas such as security configuration, security monitoring, network security, managing security incidents and knowledge of organisational policy requirements.

You will work with an assessor to complete a portfolio of evidence that confirms you have met the requirements of the qualification.

There are no entry requirements or specific skills needed to undertake this qualification.
